

## WORLD HOMEOPATIC DAY 2022

On April 9, 2022, the commemoration of Hahnemann's Day was held in the city of Barcelona, Spain, which I attended on behalf of LMHI.

The celebration began with the placement of a floral offering in the Jardins del Dr. Hahnemann, a square in Barcelona that has monuments that commemorate the discoverer of Homeopathy.

On that occasion, Dr. Josep Maria Clapers, President of the Academia Médico Homeopática de Barcelona and doctors and patients of doctors of the aforementioned entity, as well as Dr. José Luis Jimenez, NVP for Spain of LMHI, attended.

There were speeches given by Dr. Clapers and myself, as well as quotes from the Organon by patients.

Then we moved to the Academia, where I presented my lecture, *Dýnamis*: From Hahnemann to Paschero.

In that paper I analyze the Greek concept *dýnamis* that Hahnemann used to describe his vitalist model and its later variants in James Tyler Kent and Tomás Pablo Paschero.

Finally, there was a pleasant lunch with the doctors of the Academy, in which there was a spirit of comradeship that corresponds to the climate that is created whenever homeopaths from anywhere in the world get together.

Thanks, Homeopathic Medical Academy of Barcelona and Dr. José Luis Jiménez for hosting this celebration!

Dr. Gustavo Cataldi  
LMHI President
